Application/Control Number: 09/689,508

Art Unit: 3763

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-35, 38-73, 95-115, drawn to a peritoneal dialysis system/catheter, classified in class 604, subclass 29.
 - II. Claims 36, 37, 74-94, drawn to a method of performing peritoneal dialysis, classified in class 604, subclass 502.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process of using that product. For example, the claimed catheter may be used for drug delivery and/or aspiration in another area of the body, as opposed to delivering dialysate and removing fluid during peritoneal dialysis.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Examiner acknowledges that a restriction requirement was not made in the previous Office actions. However, upon further consideration, Examiner believes that a restriction requirement is appropriate in view of the above explanation and also due to

Application/Control Number: 09/689,508

Art Unit: 3763

the fact that catheters are found in many subclasses and can be used in many procedures other than peritoneal dialysis. Examiner apologizes for any inconvenience this may have caused.

Examiner also acknowledges that the previous Office action was a final Office action. However, upon notification by Applicant's representative that the finality of the action was inappropriate since the newly added claims in the preliminary amendment were not considered in any of the Office actions, Examiner withdraws the finality of the action.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ann Y. Lam whose telephone number is (703) 306-5560. The examiner can normally be reached on T-F 8-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian L. Casler can be reached on (703)308-3552. The fax phone numbers for the organization where this application or proceeding is assigned are (703)305-3590 for regular communications and (703)306-4520 for After Final communications.
